## Objective

Professional writer with over 10 years of experience in the fields of engineering, commercial and technical writing, and education looking to find a position with an organization aligned with the paradigm of doing the most good for the world at large.

## Experience

### Freelance Copywriter

2018-Present Various Companies, including The Hidden Japan (Japan) and Nativiz (France)

- Based on the client's request, research various subjects in industries ranging from software development to green energy, and write engaging stories appropriate to the audience (lay or technical)
- Provide succinct, SEO-friendly content for various online media outlets
- Meet and strategize with the client over objectives for the writing, whether they be informative, PR, or a call to action on the reader

### Other Jobs

2018-Present

- Freelance web developer, front-end focused, self-taught
- English Teacher, Nine Point Nine Eikaiwa (Japan), students of all ages

10+ Years experience with Tosoh Quartz, an international corporation in the semiconductor supply chain industry

### Technology Exchange Liaison

1/2017-Present Tosoh Quartz Japan, Yamagata

Acted as intermediary between Japan and US factories for technology exchange relating to semiconductor grade quartzware

### Product Engineer

1/2013 -1/2017 Tosoh Quartz, Portland, Oregon

- Wrote and presented monthly technical, evidence-based summaries to our major customer in regard to production change requests, ongoing projects, and quality scorecard
- Managed teams to perform Root Cause / Corrective Action analysis, and provided engineering management with highly accurate reports and recommendations toward further improvements

RPM (Rapid Prototype Materials) Engineer

1/2010 - 1/2013 Tosoh Quartz, Portland, Oregon

- Created error-free manufacturing blueprints and technical documents for high level technicians
- Wrote clear, easy to read procedures regarding safety, machine operation, and material handling for entry level operators
- Acted as primary point of contact and technical interface for the customer throughout the build

Training Development Specialist

2/2008 – 1/2010 Tosoh Quartz, Portland, Oregon

Provided in-house production of training videos and other training materials

**Education**

University of South Florida, Tampa

1998-2002

Bachelor of Science, Industrial and Management Systems Engineering

**Skills**

Native English fluency, conversational Japanese. Excellent verbal and written skills. Ability to write for different audiences and in different styles. Writing samples available on request.

High attention to detail and a familiarity with various business-oriented continuous improvement methodologies such as lean manufacturing and Six Sigma. Experience with data-driven decision making and team coordination across various departments and business processes.

I have some proficiency with the following technologies (most of which pertain to web development): HTML5, CSS, JavaScript, PHP, Node, npm, Gulp, Wordpress, Microsoft Office Suite, Google Chrome Developer Tools
